Activity

You need some space to be able to do this activity. You could clear a space in the classroom, use the sports hall or use a space outside.

1. Have one side of the space as an 'Agree' wall and the opposite side as a 'Disagree' wall.
2. Read out each statement from below (or use your own statements) and ask pupils to place themselves along an imaginary line between the two walls, depending on how much they agree or disagree with the statement.
3. Encourage pupils to talk to each other about why they chose their particular position.
4. Encourage pupils to suggest other statements to use.

Agree/Disagree statements

- All children in the world should be able to go to school.
- Girls have as much right to an education as boys.
- School classes should not have more than 30 children.
- Education is just as necessary for having a good quality of life as water or food.
- When there is conflict, children must still be able to go to school safely.
- Teachers do a very difficult job and should be well-paid.
- All children should expect to be helped when they have difficulties in school.
- School children should have a say in the appointment of new teachers.
- School children should be able to talk in class whenever they like.
- School children should have a say in how their school is run.
